NEW PLANS BEING SHAPED AT WONDER

Wonder Mine Will Benefit the Property.

DEEPER WORK NEEDED

Supplant That Now Located at Mine.

Local shareholders of the Nevada Wonder company will be interested in a recent visit of large shareholders and officials of the organization to the property, and from present indications it is evident that the property is to be improved considerably and opened far more vigorously. The gentlemen visiting the property were Vice President Austin, J. E. Spurr, the entirent geologist of Tonopah; V. B. Wooley, J. A. Eligood and J. W. Whitsman, while the purty was followed to the property by Superintendent Blackburn of the Tonopah Mining company.

Need Heavier Machinery.

The Wonder News says that the significance of this visit to the people of this district is great. The shaft is now practically as deep as it can be sunk with the present equipment, and it is the general opinion that a new and more powerful hoist will be put in place as soon as practical and the development of the ground prosecuted on a much greater scale than has been possible with the present appliances. Down to the 500 level the shaft is a

Down to the 500 level the shaft is a single hoisting compartment and a manway. When the sinking was done to the 700 level it was made large enough for two compartments and manway, and the timbers were so framed that the size may be increased without interfering with the work already done.

The present surface machinery is ample for doing the work that can be handled through the present shaft, and Increasing the machinery will therefore make it necessary to charge the upper part of the shaft. This can be done without stopping the regular work in the mine, though it would be awkward.

More Work Planned.

COPPER STOCKS ARE SCHEDULED TO RISE

James A. Poliock & Co., bankers and brokers, furnish the following, received over their private wire yesterday after-

Paine, Webber & Co., Boston.—The lo-ral market today showed a heavy volume of trading in coppers. North Butte was the leader, selling as high as 344, with a reaction at the close to 333. This re-action was caused by the selling of 2000 shares on which the trader was taking profits, having bought it when the ad-vance commenced. Hancock rallied easily on a limited amount of buying. The demand for Calumet & Arizona is steadily increasing and the stock made a new high record on this movement at 501.

coppers have made so many false E Cr Pt... .01 .02 .015 in the past five years that it is E Tintic C003 .003

The coppers have made so many false starts in the past five years that it is very hard to restore confidence in them, and every time the market becomes dull nerrous traders put in selling orders, fearing that the movement is over. This selling is well taken care of by new buying, and we confidently predict that the present movement will spread out into a broad and general copper market carrying the whole list a great deal higher.

Logan & Bryan, New York—We continue to favor the purchase of the lower-priced issues during weak periods in preference to the higher-priced stocks, for the reason stated recently that monetary and investment conditions at present appear to be against a sustained and general rise in the steck market, and, as a consequence, specialties are more likely to be the favorites.

SPECULATIVE STOCKS OF SILVER RETARD

The following authoritative statement made by a London firm in regard to silver will be interesting to the western

ver will be interesting to the western producer:
"News from India as to climatic conditions appears at the present time wholly satisfactory and as a consequence, substantial buying orders ere this would have been received from the indian bazaars, had that market been less heavily loaded with speculative stocks." Rexail

less heavily loaded with speculative stocks."

Referring to the situation in China the same communication continues: "Still it is difficult to refrain from the expectation that, before long, the Chinese loan negotiations will again assume definite shape; should that be so, a renewal of silver purchases for that quarter is not unlikely, for much of the silver that had been previously acquired in connection with loan business had been unloaded recently, and to that cause the easier prices of late have been attributable. "The exceeding importance of providing funds for payment of these troops so as to assist their dispersal to normal for this the need of large government loans is pressing."

COLUMBUS CON. IS MAKING RICH PRODUCT

Ten lots of concentrates will be marketed by the Columbus Consolidated company during the month of August, the average value of which can best be gauged by the consignment that has just been marketed. This car averaged 0.035 ounces gold, 35.9 ounces silver, 12.1 per cent lead and 6.97 per cent copper, bringing in smelter-net the sum of \$42.84 per ton.

ton.

The conditions are reported by the management as very satisfactory, the one difficulty other than the limited transportation facilities being the trouble of securing the number of men the company could employ. The transportation question soon will be satisfactorily solved by the completion of the Michigan-Utah transway, about September 1.

NORTH BUTTE DEEP ORE IS VERY RICH

The discovery on the 2400-foot level of the North Butte property during the month, and which has served to drive the stock up several points, has been reported on to the effect that it is twenty-live feet in width, the copper values for this distance ranging from 4 to 12 per ent. It is supposed that this is the Edith May vein, and that the management has established the existence of a splendid new stoping area. The walls are described as solid and ideal.

EAST INTERESTED IN PECULIAR NAMES OF BIDS FOR ALASKA UTAH COAL GROWTH

About United States Company and Its Activities.

ng in the coal mining enterprise of the fully acquainted with western conditions United States Smelting, Refining & Min- wonder where the western incorporator New Equipment Likely to ing company may be gathered from the of mining companies finds the unique names for his property and company.

Directors of United States Smelting who have within the last few weeks examined the company's Utah coal lands speak with great optimisim of the outlook for

be outputting the equivalent of 1,000,000 tons yearly.

When United States Smelting went into the coal business last spring it financed the purchase of these coal properties through sale of \$10,000,000 & per cent notes. This calls for an annual interest charge of \$900,000. This is considerably more than the coal properties are today earning net. It is probably more than they will carn until the new railroad line is finished and in operation, but it is perhaps conservative to estimate that United States Smelting is today meeting less than 5 per cent of this interest charge out of its own earnings. This percentage will steadily decline as coal output is increased up to and beyond 1,000,000 tons.

PRINCE CON. FRIDAY WAS MAIN FEATURE

There is nothing definite for publication as to when the new equipment will be installed, but Mr. Austin said that the more active development work would begin at an early date.

The work of blowing out the side of the bill to make room for the new machinery is proceeding rapidly, compressed air drills being used, and doubtless the foundation will be ready by the time the machines can be procured and hauled in.

In the meantime plenty of ore is being taken out to keep the mill running to its full capacity, and the development work on the levels already opened is proceeding as usual.

Had it not been for the Prince Consolidated stock Friday on the local exchange there would have been a rather limited showing, especially during the afternoon session. This issue defies dull times and simply pushes ahead on account of shipments and earnings, the closely held shares of the insiders and out a very limited amount held capable of being jarred loose.

Sales yesterday totaled 35,850 shares of the market value of which was siz,395.00. The following were the closeing transactions:

Prominent Visitors to Nevada Extended Comment Seen Superstition Frequently Sup- Salt Lake Has Subscribed for plants Euphony in Christen-Generous Portion of the

New Issue.

PREMIUM IS OFFERED

Success of Enterprise Is a There are many names of companies that Tribute to Interests Now Behind Company.

There are many names of companies that lack either euphony or connection, and for the sake of example the Stray Dog, Yellow or Yaller Pup, Burro, Butterfly Tairrible, Pumpkin, Skidoo, Hornet, Wasp and so on through a seemingly never ending list may be given, none of which is suggestive of a mine.

It appears that during the boom in Nevada the sellers of mining stocks were rather hard put to it for names for the countless organizations they floated upon the money of the public, and it may have been that some of the very peculiar names adopted were selected because of their catchy character. It is known, too, that the average prospector and claim locator carries with him a liberal supply of superstition, and the most insignificant thing may be so emphasized in his mind as to become an open sesame supposedly, so the prospector who names his property the Mule Hoof, because his mule managed to step in the butter, may be pardoned for his selection.

The name never makes the producer, but the name frequently assists in the development of properties by tacking the word Extension or one of the cardinal points of the compass in front of or behind the name of a well-known proposition in the neighborhood or state. One promoter once represented that his property had the extension of the ores of a famous producer, taking for granted for stock-selling purposes that the ores would extend half-way across the long trend of the state that separated the two. of the Alaska Gold Mines company is being sought by both eastern and western investors is one of the features of was reported over the wires yesterday

was reported over the wires yesterday that the east realizes that the subscriber will get much less than he has asked for and the bids yesterday reached \$5.75 per%share for the stock, with the first payment of \$5 paid in. This means that the subscribers who cannot get all the stock they want at \$5 are willing to pay a premium of \$1.75 a share for the same. It is stated by one knowing local activity in this matter that almost the entire issue of the stock could be placed here in Salt Lake City, for local investors who were fortunate enough to ride with the interests behind the new company in the Utah Copper, Ray Consolidated, Chino and Butte & Superior companies have sent in bids for a very large share of the issue. This fact is considered about the most sincere tribute the home people could pay to D. C. Jackling and his associates, demonstrating the following that universally will attend success and well-placed confidence.

Shaving Down Allotments.

two.

There is more of psychology or super-stition than suphony in the selection of names for mining properties, and even the western man could find material for puzzled thought were ne to read over a list of hundreds of reguarly organized companies of his state or vicinity. James A. Pollock & Co., bankers and brokers, furnish the following, received over their private wire yesterday after-noon:

Shaving Down Allotments.

It is hard to tell just where the subscriber will get off with this proposition. The man who wants a thousand shares may have to be contont with a fraction of that number, and the greater the subscriptions the smaller the fraction. The issue has been oversubscribed several times, and the books will not close until August 28.

In regard to their entering upon the gold mining industry. Hayden, Stone & Co. recently issued the following information:

Comparable, in the nature of their operations, with the great, low-grade, porphyry copper mines like Utah Copper and Nevada Consolidated, though on a somewhat smaller scale, are the big, low-grade gold mines. Well managed properties in this group have proved tremendous successes, yet comparatively little is known of them by the investing public. Perhaps this is because gold mining has been more abused than any other form of mining and advantage has been iaken by the unscrupulous to float many so-called gold mines having little or no substance, with the result that the public has been mulcted of many million dollars.

Ideal Investment.

South Utah

South

dends.

We would particularly call attention to the steady average yield of the ore and of the low cost per ton. The latter is all the more remarkable as, of course, the general economic conditions in Alaska are not as favorable as those in most of the large mining camps of this country.

Big Tonnage Ahead.

There are compensating advantages, however, and these, with the most efficient management, have resulted in the low cost shown above. The management has steadily maintained a policy of extensive development work, for the last ten years, this item having averaged over 10,000 feet per annum. Consequently, in spite of the enormous tonnage that has been, and still is, being steadily extracted from the property, the ore reserves have not only been maintained, but increased, from year to year, and at the present time, constitute fully ten years supply.

This is, of course, from an investor's standpoint, as we have always insisted in connection with the low-grade porphyry mines, a matter of supreme importance, and to emphasize this point we submit a table showing the tonnage milled and the ore reserves at the end of each year for the last ten years.

Ore Milled. Ore Reserves.

Year.	Total Tons	Av. Assny per Ton	Total fons	per Tor
		Tra		
1901	457,803	\$2.16	2.917.589	\$2.0

1906	877,170	2.46	3,959,404	2.4
1807	702,963	2.38	5,049,792 4,982,888	2.1
1908	748,097	2.31	4,664,743	3.0
1209	768,628	2.95	5,806,792	9 5
1910		2:95	6,899,364	3.8
1911	770.084	2.55	6,637,370	3.1
1911	*579,180	2.71	7,613,087	3 4

In short, such an enterprise constitutes in gold mining, what the Utah Copper does in copper, combining, as it does, the two essential factors of a large developed supply of raw material, with an assured sarning capacity.

The shares of such a proposition may well be regarded as among the most desirable of high-grade manufacturing investments. The shares not only of the Alaska Treadwill, but of the Alaska United and the Alaska Mexican, very similar enterprises, are actively quoted in the London market. All three are regular dividend payers and all command a hand-some premium.

Metal Market.

The metal quotations for Friday, post-ed by McCornelk & Co., were as fol-lows: Silver, 62ac; lead, \$4.50; copper,

The Utah Ore Sampling company on Friday released four cars of ore from Utah and two cars from Nevada camps.

COPPER SHARES AT TOO LOW AN EBB

The statistician can find abundant rea have not begun to discount the improved market position of the red metal. wenty active copper shares are taken as an example, and their average mar-ket price is 3 points lower than the averket price is 3 points lower than the average high for June, when the companies were receiving only 15 cents a pound for their copper. The June average was 45.80, as compared with 58.50, the high for 1910, when copper was bringing 4 cents per pound less than it is now.

Nothing but the lack of public interest or fear of additional political complications can be the answer to this market condition, for the stocks represent companies making the highest earnings for many years.

Mining Notes.

The Ray Consolidated July output measured 8,105,165 pounds of copper.

The Bamberger and McCornick interests of this city are reported to have acquired the control of the Cash Boy lease at Tonopah.

The Ely Consolidated company has started to crossout on the 700-foot level of the Zack shaft for the vein had on the upper levels. The Union Chief property on the lowest level is reported to be looking extremely well. The management is now engaged in the pelasant task of hauling ore to the railroad.

A car of first-class ore is passing through the local smelters from the Alta Consolidated property, another car is being sampled while at third is being loaded at the mine

"I was cured of diarrhoea by one dose of Chamberlain's Colic, Cholera and Diarrhoen Remedy," writes M. E. Gebbardt, Oriole, Pa. There is noth-

ing better. For sale by Schramm-John-

on, Druge.

Never heard of a Coal Dealers Convention in Salt Lake; Guess there

sin't Brick-bats enough to go around.
